

International Workshop on "Security and Privacy: Exploring the Synergies and Differences"

The Second IEEE International Conference on Information Privacy, Security, Risk, and Trust (PASSAT2010)

August 20-22, 2010, Minneapolis, Minnesota, USA

<http://www.iisocialcom.org/conference/passat2010/>

These days we hear a lot about the synergies and overlap between security and privacy. After all, it's hard to envision how information can be kept private if it cannot also be kept secure. But how similar are these areas really, and what are the implications for research and practice in each area? The objective of this workshop is to explore not only the advances in the research and practice of security and privacy, but also the synergies and differences between them.

There have been many advances in security and privacy. They are often mentioned in the same breath, and this conference is a good example of that phenomenon. However, privacy practice is often driven by legal documents (regional, national, and international law), whereas security practitioners may be concerned with how much security is enough for a given system. Some organizations feel that the chief security officer should not be the same person as the chief privacy officer and that they should not report through the same management chain, because sometimes security and privacy goals conflict. This conflict is also likely to have an effect on the organization's security and privacy practices. These and other issues raised in position papers will be considered at the workshop.

We are interested in papers that address the overlaps and differences between security and privacy, as indicated by the following areas:

- organizational models for security and privacy practice
- conflicts between security and privacy goals
- risk assessment for security versus privacy
- security techniques that are successful for privacy or vice versa
- security techniques that are unsuccessful for privacy or vice versa
- reports on and lessons learned about project successes and failures in security and privacy
- reports on and lessons learned about research successes and failures in security and privacy
- the real overlaps and the real differences between these two fields
- promising areas for future joint research and practice in security and privacy

Workshop Paper Submission

Papers should be in IEEE conference paper style, be six pages or less in length, and be in Microsoft Word or PDF format. Submit your paper directly to Nancy Mead, the workshop co-chair listed below. All papers will be peer reviewed. If a paper is accepted, at least one of its authors must attend the conference to present the work in order for the paper to be included in the IEEE Digital Library. Selected best papers will be recommended for submission to special issues of journals.

Important Dates

Draft Paper Submission: April 15, 2010	Notification of Acceptance: June 1, 2010
Camera Ready Paper Due: June 15, 2010	Author Registration: June 15, 2010

Workshop Co-Chairs

Nancy R. Mead, Carnegie Mellon University, [nrm\[at\]sei.cmu.edu](mailto:nrm[at]sei.cmu.edu).

Saeed Abu-Nimeh, Websense, Inc., [saeed\[at\]abu-nimeh.com](mailto:saeed[at]abu-nimeh.com).

Program Committee Members

Elisa Bertino, Purdue University

Lorrie Faith Cranor, Carnegie Mellon University

Tom Hilburn, Embry-Riddle Aeronautical University

Jeff Ingalsbe, University of Detroit Mercy

Khaled Khan, Qatar University

Paul El Khoury, SAP Research

Andrew Kornecki, Embry-Riddle Aeronautical University

Lin Liu, Tsinghua University

Mohammed Zulkernine, Queens University
